OFFSETTRYCK

Anvisningar till begagnandet

Det *svenska ordförrådet* uppföres i bokstavsordning; dock ha reflexiva verb fått sin plats omedelbart efter motsvararande enkla verb. Regelbundet bildade sammansättningar anföras ofta gruppvis inom [ ] under första sammansättningsleden. *Om alltså en sammansättning ej återfinnes på sin plats i ordboken, bör den sökas under första leden.* T. ex. *öfolk* under **2 ö**; jfr även **vatten-**, **ögon-**.

Utom de nederst på varje sida förklarade *tecknen* ha följande använts:

‖ för att undvika upprepning av den del av ett uppslagsord, som är gemensam för de följande i samma artikel och för böjningsformerna. Jfr **furst‖e** *-en -ar*, **-endöme, -inna, -lig.** Då ändelsen lägges till slutet av genom ‖ avdelat ord förses ändelsen med ∼. T. ex. **aske‖s** ∼*en* ∼*er* **-t** ∼*en* ∼*er*.

| a) i *svenska* ord för att beteckna var ändelserna tilläggas, t. ex. **and|e** *-en -ar* samt

b) i *svenska* sammansättningar för att särskilja sammansättningslederna, då detta av tydlighetshänsyn synts vara önskligt. T. ex. **kor|stol, kors|tåg.**

Tre olika slag av *klammer* ha använts:

1 [ ] som utmärka ord el. dyl., vilka kunna utelämnas utan skada för meningen; även i hänvisningar t. ex. [*störta i*] *fördärv* under **förstöra,** för att beteckna, att frasen bör sökas under **fördärv.**

2 ( ) som beteckna varianter av det föregående; ett inskjutet "el." anger att en betydelseskillnad föreligger.

Märk, att för tydlighetens skull både [ ] och ( ) stundom användas för att avskilja ett ord eller uttryck i synnerhet i de med den minsta stilen tryckta förklaringarna.

3 ⁅ ⁆ som meddela nödiga upplysningar om föregående engelska ords konstruktion och användning.

Egennamn anföras på sina platser i alfabetisk ordning, men endast de vanligast förekommande ha medtagits. Många ha dessutom utelämnats på grund av likheten mellan den svenska och den engelska formen, t. ex. *Macedonien* Macedonia, *Korea* Korea.

Under avledda ord såsom *adverb, substantiv* på **-het,** *particip* och *verbalsubstantiv* har ofta tecknet "&" eller ordet "av." använts

General Observations

The arrangement of the *Swedish vocabulary* is alphabetical; reflexive verbs, however, are placed immediately after the corresponding simple verbs. Regularly formed compounds are often grouped under their first component. *If, therefore, a compound is not found in its dictionary place, reference should be made to the initial element.* E. g. *öfolk* under **2 ö**; cf. **vatten-, ögon-.**

Besides the *signs* explained at the foot of each page use is made of the following:

‖ to avoid the repetition of that portion of a title-word which is common to those that follow in the same paragraph and to the inflected form. Cf. **furst‖e** *-en -ar*, **-endöme, -inna, -lig.** When the termination is added to the end of a word divided by a ‖, the termination is preceded by a ∼. E. g. **aske‖s** ∼*en* ∼*er* **-t** ∼*en* ∼*er*.

| a) in *Swedish* words to denote where the terminations are to be added, e. g. **and|e** *-en -ar*, and

b) in *Swedish* compound words where it is desirable, for the sake of clearness, to show of what elements they consist. E. g. **kor|stol, kors|tåg.**

Three kinds of *brackets* are made use of;

1 Square brackets [ ], enclosing a word or words that can be omitted without loss to the sense; also in references, e. g. [*störta i*] *fördärv* under **förstöra,** to imply that the phrase is to be looked for under **fördärv.**

2 Round brackets ( ), giving variants for what precedes; an inserted "el." (= *eller* or) indicates a marked variation of sense.

Note. Both square and round brackets are also sometimes employed, especially in the small-type explanatory matter, to separate off one word or phrase from the context for the sake of clearness.

3 Dashed brackets ⁅ ⁆, embracing information as to the construction or usage of the preceding English word.

Proper nouns are inserted in their alphabetical places, but only those of most frequent occurrence are given. Some, furthermore, have been omitted on account of their similarity of form in the two languages, e. g. *Macedonien* Macedonia, *Korea* Korea.

Under derivative words, such as *adverbs, substantives* ending in **-het,** *participles* and

för att beteckna, att andra engelska motsvarigheter än de anförda kunna regelbundet bildas av motsvarande *adjektiv* eller *verb*. Så betyder under **trolöshet** och **trolöst** "faithlessness &" och "faithlessly &", att *unfaithfulness*, *perfidiousness* och *unfaithfully*, *perfidiously* kunna bildas av de under adjektivet **trolös** anförda engelska orden. Under **utväljande** betyder "äv. choice, selection", att utom *choosing* [*out*], *selecting*, *making choice of*, regelbundet bildade av de under **utvälja** befintliga översättningarna även "choice" och "selection" kunna användas.

Vid *enkla* verb betecknas konjugationen med en liten siffra. Undantag: verb på *-era*, som alltid böjas efter 1:a konjugationen.

Vid översättning av *yrkesbenämningar* och dylika bör ihågkommas, att dessa i allmänhet ej kunna användas som titlar framför personnamn i engelskan. Jfr: *Skräddar P.* [Mr.] P., the tailor; *Överstinnan Q.* Mrs Q. [, wife of Colonel Q.].

Vid avstavningen av engelska sammansatta ord, vilkas leder äro förbundna med varandra medelst bindestreck, har bindestreck använts såväl i slutet av första som i början av andra raden.

verbal substantives, the sign "&" or the word "äv." has often been employed to signify that other English equivalents besides those given can be formed regularly from the corresponding *adjective* or *verb*. Thus, under **trolöshet** and **trolöst**, the renderings "faithlessness &" and "faithlessly &" denote that *unfaithfulness*, *perfidiousness*, *unfaithfully*, *perfidiously* can be formed from the words given under the adjective **trolös**; under **utväljande** the rendering "äv. choice, selection" implies that besides the renderings *choosing* [*out*], *selecting*, *making choice of*, formed regularly from the words given as renderings of **utvälja**, "choice" and "selection" may also be used.

Occasional use has been made of marks of quotation, where a Swedish word or phrase has been transferred into English rather than translated. Cf. **auditör, måbär**.

After the *Swedish substantives* there are given the form of the enclitic article and the inflection for the plural. E. g **gosse** *-en -ar: gosse* = boy, *gossen* = the boy, *gossar* = boys. [See, further, notes at foot of each page.]

The small figure appended to each *Swedish verb*, above the line, gives the conjugation to which the verb belongs. Exception: verbs ending in *-era*, all belonging to the first conjugation, have no figure appended. [See, further, the Swedish Grammars.]
